DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species: species I is disclosed in Figure 1, species II in Fig. 3, species III in Fig. 6, species IV in Fig. 8, species V in Fig. 9, species VI in Fig. 10, species VII in Fig. 15, species VIII in Fig. 16, species IX in Fig. 17, species X in Fig. 24, species XI in Fig. 26, and species XII in Fig. 27. The species are independent or distinct because they contain different components, and different combinations of circuits to comprise the pre-processing circuit.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no generic claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 2622

the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).
